## Oahu Termite and Pest Control Exterior Treatment

Units which have back lanais that are inaccessible must have someone present to let the pest specialist walk through your unit. If no one is home, the back of your unit will not be treated for pests. They suggest the following preparations:

1. Move items such as hoses, bicycles, cabinets, toys, etc. **a minimum of three feet away from the exterior perimeter of your unit** during and 2-3 hours following treatment.
2. **Keep pets indoors** or secured away from the treatment areas during the treatment process and **for 2-3 hours following treatment or until the residue is dry.**
3. Check with and inform all chemically sensitive people to be aware of the treatment and/or have them stay indoors or away from the property during and **2-3 hours following treatments.**

Avoid washing the treated areas with water as this may compromise the effectiveness of the treatment. Thank you for your cooperation. If you have any questions or concerns, **or would like to schedule an interior treatment at the owners expense call: Oahu Termite and Pest Control @ 808-596-8600**
